East Palo Alto Police Department Patrol Vehicle are now equipped with Automated External Defibrillators (AED's)

Effective Tuesday, May 28, 2019, East Palo Alto Police Department patrol vehicles are now equipped with Automated External Defibrillators (AED's). Thanks to generous donation of 13 AED's from the non-profit group "Racing Hearts" that is based in Palo Alto, our officers will be prepared to render aid in the event they encounter a person in cardiac crisis.

Although our officers had previously received training on the operations of AED's, they would only have been able to use them if one was readily available. With the generous donation of the devices from "Racing Hearts", each patrol officer will have this potentially lifesaving technology available for their use in their vehicles.

Prepared by:

Chief Albert Pardini
